EDUCATION

Gitam university , Visakhapatnam *August 2022 - Present*
Department of Computer science and Engineering

Ascent Junior College, Visakhapatnam Passed in 2022
Intermediate

Sri Prakash Vidyaniketam, Visakhapatnam Passed in 2020

TECHNICAL STRENGTHS

Programming & Skills	C,python,java
Python Packages	numpy, pandas, matplotlib, openCv

PROJECTS

Breaking Communication Barriers for Deaf and Mute People with Mobile Technology
Project
The aim of our project is to develop a system that facilitates communication for deaf and mute individuals using mobile technology. The system provides a platform for translating sign language into text or speech and vice versa, enabling easier interaction with the wider community. This project leverages mobile devices to bridge communication gaps, making day-to-day communication more accessible and inclusive for everyone.

Hotel Management System
Mini Project
The aim of our project is to develop a system that partially automates the operations in a hotel, such as managing hotel and room details, setting sale prices, finding the cheapest available rooms, and searching for rooms based on customer preferences like occupancy, price, and star rating. The system simplifies hotel operations by organizing room availability and price management efficiently.
